Project Description:

Mini C compiler

I will make a simple C compiler which will be used to compile a C program. It will be able to handle basic and fundamental syntactical structures. It can handle typical variables, loops, conditionals etc.

Specify the exact operations of the compiler. Akh

Condition detection (if, else if, else, switch), loop detection (for, while, do while), function detection, statement detection, nesting level detection and show output as errors.

Languages or Tools to be used:

C++
